Microsoft needs to pay either cash or buy apple computers for the schools. \$1 Billion in Cash to all low income schools to use at their disgression....except purchases of any Microsoft Products or any products using Microsoft Software of any sorts...Unless it is a brand new Apple computer system. That is a true punishment that would make them think twice about trying to undermine other computer companies again!

Think about this and know it is truth.....Microsoft is out to take over and control the entire computer, software and digital lifestyle of all people world wide.
